# Table of Contents

This isn't a lecture we'll get to, but here's some slides for those curious!

## Interactive Shells

- Your environment is already setup and ready to go now that you have logged in.
- Now do the lightweight configurations, put in your `rc` file.
  - The `~/.bashrc` for `bash`
  - The `~/.kshrc` for `ksh`
  - The `~/.zshrc` for `zsh`
- Things you put in these files:
  - Shell specific **aliases**, **functions**, etc.
- Things you **never** do:
  - `source ~/.bash_profile` from `~/.bashrc` for example.
  - It goes the other way: `~/.bash_profile` sources `~/.bashrc`
  - Initial *login* shell is is when `*profile` get sourced
